RESEARCH INTERESTS

Current research interests include: 1) the relationship between alcohol, drugs and violence; 2) development and implementation of violence prevention interventions for men and women with substance use disorders; 3) substance use disorder treatment engagement and outcomes; 4) impact of brief interventions based on motivational interviewing in a variety of health care settings (e.g., primary care and ED settings, samples include adults and at-risk adolescents), 5) health services utilization and care quality (e.g., depression care in the Veterans Administration, predictors of treatment engagement and utilization for individuals with and without comorbid psychiatric and substance use disorders).
